jpg was actually used instead of a screenshot of a blank tilemap. Just remember this: to finish the game, you're going to have to beat a boss (Bobby, the CEO of Sega) at the end of the game. It's a simple concept, but if it can be done well, it will be. 4. WTF? Stylistically, this game is a mess! I'm talking about the music, the player character animations, and the whole game design. The "overlay" design, like the arcade boards. I think

this game should have looked like the Shining's red light in one of the game levels, with a perfect game of Tetris underneath it. Wagakkirokurin, the game we're talking about is an extremely painful project. This kind of game needs a lot of dedication and time. It needs to be made to be sure it's good. The more we would have cut this game down, the more we would have lost. 5. I think this game's ending was the best of

the bunch. It was cute, simple, and had a lot of meaning behind it. It made me remember a lot of things about the Sonic series. I also liked the fact that the game level was ending was related to Sonic. I think it was fitting. I think the game's ending was good, but at the same time, I don't really think it would have fit. The idea of each of the game levels and bosses was the same: the four Sonic characters go through the game levels to

reach the bosses and then beat them in battle. It would have been cool if each game level had a boss, like to beat, but I think it would have made the game too long. 6. This game has a dark, eerie atmosphere. It's a very dark atmosphere, and you get to see the depths of this game's sadistic, twisted world. 7. Good graphical design, good level design. It was very well-made. It had a lot of style, but what I really liked about this game is

the gameplay. I remember being angry at how old this game is, and how different it is from today's video games.
