What's New in the?

Htmleditor is a lightweight HTML Editor designed to make creating HTML, XML, JavaScript, and other text files easy. It lets you create and edit multiple files at the same time. A built-in syntax checker and save/load feature make it an ideal tool for writing html or css. Edit one file, and have the changes automatically reflected in every other file that you edit. What's New Version History 3.9.1 Feb 9, 2017 - Fixed startup crash issue (Issue 4656) 3.9.0 Jan 26, 2017 - Added a new function for easier uploading files (upload.php) (Issue 4308) - Added a find and replace feature (Issue 3710) - Fixed problem with saving multiple files (Issue 3711) 3.8.1 Dec 23, 2016 - Fixed a bug where it was not possible to disable font icons for certain element types (Issue 3714) - Fixed an issue where files were being loaded twice in the document editor (Issue 3710) - Added a function for easy switching between source and preview mode (Issue 3840) - Fixed an issue where the orientation of the preview pane could not be changed (Issue 3840) - Fixed an issue where the font type was not being applied when setting the text for the span tag (Issue 3840) - Fixed an issue where scrolling was not working correctly with the flexbox (Issue 3840) - Made preview pane orientation configurable (Issue 3840) 3.8.0 Nov 23, 2016 - Added function for rendering lists in the preview pane (Issue 3827) - Added a filter feature for the filter and advanced filter buttons (Issue 3731) - Added a link to the plugin index page from the menu bar (Issue 3419) - Fixed a small issue where preview pane was not showing up in the dialog (Issue 3455) - Fixed an issue where the "Clear preview" button was missing when the preview pane is empty (Issue 3455) - Made the preview pane easy to navigate with the black backdrop option (Issue 3455) - Fixed an issue where the height of the preview pane was not being calculated when it contained no child elements (Issue 3455) - Made the editor window height configurable through the setting panel (Issue 3455) - Fixed a small issue where the "Cancel" button was not showing up when editing multiple files (Issue 3455) - Fixed an issue where the height of the preview pane was not being calculated when it contained no child elements (Issue 3455) - Made the editor window height configurable through the setting panel (Issue 3455) -
