Importance of Player Intelligence “What's changed in FIFA is that we are offering more realistic attacking AI, more dynamic defensive and movement AI and a new concept in build-up. It's about players acting on instincts. Every defender has a planned movements and tactics. When they are out of balance they will make a reaction to the ball and vice-versa. This implementation is now on and it has a massive impact. It's like having a player with an eye for the game. We have a very competitive and intelligent AI,” explained Sebastian Buch, Head of FIFA’s AI and Player Intelligence department. “We have a team of 25 people who are working on player AI and improvements as well as technological developments and we have a remarkable pool of video game development talent – more than 600.” In a press release, Buch added, “In the past, in most shooting games, players would run straight at the ball. Now, if they have the chance, they will run to one side, or stop and turn with the ball. AI players now accelerate with the ball. It’s like they have a plan to run straight to an object. On the pitch, they think more in less time, and act more quickly on the pitch than players do in real life.” Expand visibility when controlling players in the field of vision of others. Isolate players, in

Fifa 22 Features Key:

- A great goalkeeping shape is back in FIFA 22, bringing a fresh low of depth at the highest level. Goalkeepers have never been better at low volume striking shots.
- InFamous, too, is more of a success on the PS4. With brand new melee attacks, new customisation options, and new enemy types, abilities, and movements, the two InFamous titles on PS4 offer a more complete experience, even if they're scaled down from the PS3 versions.
- The way players and AI react to contact has been improved, meaning smarter and more balanced AI. This is a high point in the series, and we hope EA gives us more of the same in FIFA 24.
- Additionally, the ball physics on the pitch have been improved, making it that much easier for your favourite players to touch it and see more shots go in.
- The all-new Frostbite engine and, in particular, the significantly improved lighting has made the world of FIFA more beautiful than ever, providing a never-better picture.
- Made with the help of the very best in soccer analytics, FIFA 22 uses hyper-detailed data from actual matches across the best leagues around the world to ensure that every contest in all game modes is truly authentic, every match is truly earned, and every goal is truly scored.
- Graphically, FIFA 22 is the most powerful FIFA yet. Everything looks stunning, the stadiums are larger and more detailed than ever, the ball behaves at higher speeds, and crowds and

-
- crowds of players react to your every touch and move.
- The player set-up methods have also been enhanced with the addition of free kicks in all directions, goal kicks, free headers and drag and passes while running. Highly popular skills such as dribbling, slide tackles, and goal kicks have been made even more responsive.
 - FIFA 22 introduces 'HyperMotion Technology' and includes new features to bring the most realistic, immersive and interactive experience for players.

On the pitch, football fans and players now have the power to navigate the ball with the ball's trajectory appearing in real-time on the pitch. And the most dynamic player reactions ever seen in football games are now a reality as players will react off the ball, anticipating the direction of the ball and then dictating the action of their teammates. Additional gameplay improvements include FIFA Ultimate Team™ game-changing changes, including the introduction of new stars and FUT Draft. Footballers now use their speed more intelligently in possession, anticipating when they need to change direction or accelerate while using tackles and build-up play to retain the ball. More tactical options mean no two games will play the same. New Passengers system allows you to design a fully customized attacking lineup. Passengers can be manually picked or automatically selected from squad rotation and FUT Draft. Passengers have unique skills and abilities that are not directly linked to the role you play. Tactical Defending has been added to highly competitive games, giving you
